

INTAKE CHECKLIST

Vehicle Intake — Step by Step

Work top to bottom. When you finish, everything an RO needs is in **MDD**.
If a box can't be checked, the truck isn't done.

- ☐ **Verify the MDD tracking tags** are present on **both the key and the vehicle**. Do this at any point during intake — the truck isn't done until both are confirmed.

1

UVEye Scan

UVEYE

- ☐ Pull the truck through the **UVEye machine** — full body, undercarriage, and tire scan.
- ☐ **Tie the VIN to the scan right away**, before moving on — so the scan attaches to the correct truck.

2

vAuto Appraisal & Photos

VAUTO

- ☐ Open **vAuto** and find the truck's **original appraisal** (click Appraisals, enter the last 6 of the VIN).
- ☐ Click on the original appraisal, then click the 3 dots in the top-right corner and select **“Copy as New”** to create the working record.
- ☐ **Update the mileage** to the actual odometer reading.
- ☐ Add **walk-around photos** — see the shot list below.
- ☐ **Mark and photograph every damage or fix** on the truck. If it needs work, it gets a photo.
- ☐ **Final step:** click the 3 dots in the top-right corner again and click **“Save”**.

PHOTO SHOT LIST

Exterior ·10	4 corners · front · rear · both sides · roof · bed
Interior ·6	driver · passenger · dash · center console · both rear seats
Wheels	all 4 wheels · tire tread ×4
Plus	each damage / fix

- ☐ **Scan or manually enter the VIN** to start the quote.
- ☐ **Verify the truck information** is correct.
- ☐ Add the **stock #** and the **Estimator**.
- ☐ **Take and upload photos** of the damage.
- ☐ **Confirm the quote is accurate** and make any necessary adjustments.
- ☐ Click the **PDF button** and attach the quote to the **MDD card** in the attachment file (Step 4).

- ☐ **Add the tasks the truck needs** from the catalog, comparing against your walk-around (Body Shop, Bumper, PDR, Tires, Detail, etc.).
- ☐ If **emissions are not ready**, add a **Drive Cycle** task.
- ☐ **Confirm the Body Quoter estimate PDF** has been added to the MDD card.
- ☐ Make sure **all relevant flags are added** to the vehicle card.
- ☐ In **Communications**, spell out the **body shop work** in detail — note each damage, the specific panels affected, and exactly what needs to be repaired or replaced.

RO-Ready Check — all true before intake is done

If every box is checked, an RO can be written with zero follow-up. If not, note why and flag the VPM.

- | | |
|--|---|
| ☐ VIN tied to the UVEye scan | ☐ Current mileage entered |
| ☐ vAuto record copied as new | ☐ Full walk-around photo set |
| ☐ Every damage / fix marked & photo'd | ☐ Body Quoter estimate PDF in MDD |
| ☐ Recon tasks added in MDD | ☐ MDD tracking tags on key & vehicle |
| ☐ All info in MDD, RO-ready | |

- ☐ Intake complete → **move the vehicle to the MPI Queue step in MDD.**
